

SOLIDARITY INSTEAD OF PANIC BUYING

Most people who have followed the news in the last few days know it: Corona is life-threatening for some groups of people, but not for others. Particularly vulnerable people cannot choose isolation, it is their only perspective. These people have to take precautions and, for example, build up stocks of supplies. As a completely healthy and safe person this is not the case, especially not to the same extent. We are promoting consideration and solidarity.

SOLIDARITY NEIGHBOURHOOD AID

We want to organise neighbourly and help in solidarity. We offer a platform for exchange for this extraordinary situation, which affects us all, but not equally hard. In the following you will find links and informations about the coronavirus and a possibility to post and receive offers of help.

Isolation, hoarding and selfishness will not help us in such a challenging situation. What we need now is solidarity, mutual support and cohesion even in isolation. Because we may distance ourselves spatially, but socially we stand together closely.

EVERYONE CAN CONTRIBUTE SOMETHING!

Whether it's lending a car, providing transport services, looking after children, shopping, taking out the rubbish, offering advice according to profession and ability, making bicycles available, redistributing food and commodities, organising financial support and so on. Depending on the situation and needs can be arranged here.
